## Bnai Zion Medical Center – Haifa, Israel

Bnai Zion Medical Center (formerly Rothschild) was founded in 1922 as the first Jewish hospital in the city of Haifa. It is now a government hospital with 454 beds and nearly 2,000 doctors, nurses, healthcare professionals and administrative personnel. We provide advanced healthcare to all citizens of northern Israel with an exceptional standard of medical care and human service. As a community establishment, the medical center sets a prime example of coexistence and multiculturalism that characterizes the city of Haifa.

Bnai Zion is a center for innovation, affiliated with the Faculty of Medicine at the 'Technion' and proud of dozens of our senior doctors who teach the future generation of Israeli physicians, and are selected as outstanding lecturers every year. Our Nursing School, affiliated with the Department of Nursing at the University of Haifa, holds extensive research collaborations with the university, advancing the field of healthcare support.

Our medical staff is passionate about finding new courses of treatment. We take pride in being a research-oriented institute and therefore regularly take part in national and international, professional and academic conferences and share our unique findings. We also facilitate periodical peer to peer exchange of views and form collaborations with hi-tech industries in a variety of disciplines.

Our Vision is to bring true value to our community, based on core areas of expertise, as a leading medical center in the region. Our objective is to serve as a meaningful anchor in multiple fields:

### Community

Demonstrating leadership in promoting healthy living and wellbeing in the community.

### Business

Creating growth opportunities by collaborating with high-tech ventures and biotech companies.

### Academia

Supporting local scientific educational programs in high schools and leading academic institutions in the city.

### National

Sharing our accumulated knowledge and experience nationally and with peer hospitals to affect systemic impact.

Among our many good hospital wards, some of our unique medical services, spearheading the region: Dental Clinic for children and adults with special needs, Clinic for diagnosing children on the autistic spectrum, Adolescent Health Clinic, a leading center in Invasive Radiology, a national center for treatments of life-threatening allergies in children and adults, pioneers in Cochlear Implant operations - to correct hearing in children and adults, Multidisciplinary Center for Victims of Sexual Assault, a leading Rehabilitation Department in Israel: Occupational Therapy, Physical Therapy and Hydrotherapy, the only Cardiac Rehabilitation Institute in northern Israel, introducing Integrative Medicine treatment alongside conventional treatment throughout the hospital's wards and more.

The challenges of development and renewal never cease and alongside the impressive achievements of the hospital, we are constantly working to push the boundaries of medical excellence. By investing in the most advanced medical equipment and by integrating innovative treatment methods and advanced technologies in our work, we aim to provide the highest standard of care for all our patients. **We understand we will only be able to do so by not resting on our laurels, forever insisting on getting better and by the support of those who share our passion for impartial, excellent medical care in Israel.**
